

Re:
Applicant: High Tech Computer Corp
FCC ID: NM8HERM100
Correspondence Reference Number: 31856, 31857, 31858
731 Confirmation Number: EA859681
Date of Original E-Mail: 10/20/2006

Dear Steven,

Subject: Info Request

1. Original filing had co-transmitting SAR results listed; not found in this filing. Please explain or, if other parts of SAR exhibits are still valid, please amend only pages with co-transmitting SAR info.

<Response> SAR co-located data for all worst-case modes are added to page 19, 21, 22, 34, 35 and 36. All other pages are valid and remain no change. Also, Appendix A has been revised to include the SAR measurement plots. Please refer to uploaded new SAR reports.

2. Upon review of the original filing for the referenced application, we noticed that the WCDMA and EDGE modulation modes were available from the device, but were not printed on the Grant of Certification. Please provide the emission designators for these modes so that we may go back and correct the original filing, and add to the current Class II PC filing pending.

<Response> Please use following Emission Designators for the correspondent modulation and band.

WCDMA	4M68F9W	PART 22
	4M70F9W	PART 24
EDGE	312KG7W	PART 22
	310KG7W	PART 24

Best regards,

Gary Chang
