

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a light-colored wooden bench. A thick orange cable connects it to a grey metal chassis on the floor. The chassis has a red emergency stop button and various ports. To the right is a large, light-colored wooden table. The background is a plain grey wall with a power outlet.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls, floor, and ceiling are covered with white, square-shaped electromagnetic interference (EMI) absorbers. A black metal frame stands in the center, supporting a white electronic device. The floor has yellow and black striped safety tape.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz range. The test chamber is lined with white, square-shaped electromagnetic absorbers. A white test table is positioned in the center, and a metal frame structure is visible on the left. The floor is marked with yellow and black diagonal stripes.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz range. The test chamber is lined with white, square-shaped electromagnetic absorbers. A white test table is positioned in the center, and a red and black antenna is visible on the right. The floor is marked with yellow and black diagonal stripes.
