Subject: 回信: MXF-AP940422AG- Gemtek 11abg AP

Dear Steve

Q1. The domain entry is only an indicator of which domain the EUT is designed for. The US model has been locked to US domain internally through special firmware and is not changeable by end user.

Q2. This is just a regular RJ45 Ethernet cable bundle with EUT.

Thanks for your assistance!

Best Regards

Wendy Liao

主旨

MXF-AP940422AG- Gemtek 11abg AP

Dear Wendy,

TCB Review Comments for (244 MXF-AP940422AG- Gemtek 11abg AP)
-EMC-

Question #1: P27 and 29 of user's manual show domain entry. Please clarify if user is able to select different regulatory domain for different channel and power?

Question #2: P8 of users manual; what is patch cable for?

Best regards,

Steve Cheng
