

Datasheet USW-Mission-Critical

# **UniFi Mission-Critical Switch**

Infrastructure PoE Switch with Uninterruptible Power Supply.

UniFi Mission-Critical Switch delivers power to vital network devices while maintaining high reliability via multiple powering options: internal battery backup, AC power, and external 48VDC battery (not included). The managed Layer 2 switch offers nine Gigabit RJ45 ports: four with 802.3bt PoE++ to power UniFi Access devices, four with 802.3af/at PoE to power UniFi APs, switches, or cameras, and one for uplink to the gateway. Two AC outputs power 100-120V devices, including the modem and gateway.

The 1.3" touchscreen provides current switch states and the necessary information you need for quick diagnosis. AR (Augmented Reality) switch management simplifies network changes.

The UniFi Network Controller and UniFi Network mobile app allows admins to configure and monitor virtually all of the switch features in an intuitive graphical user interface from anywhere.

### Mechanical

Dimensions	442 x 480 x 44 mm (17.4 x 18.9 x 1.7")
Weight	Without Mount: 9.01 kg (19.86 lb) With Mount: 9.2 kg (20.28 lb)
Enclosure Material	SGCC Steel
Mount Material	SGCC Steel

# FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including
- interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operations of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

# **RF Exposure Warning**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.

### ISED Canada CAN ICES-3(A)/NMB-3(A)

This device complies with ISED Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- 1. This device may not cause interference, and
- 2. This device must accept any interference, including interference that may cause undesired

operation of the device.

# CAN ICES-3(A)/NMB-3(A)

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. l'appareil ne doit pas produire de brouillage;

2. l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est sus ceptible d'en compromettre le fonctionnement.

## **RF Exposure Warning**

The antennas used for this transmitter must be installed to provide a separation distance of at

least 20 cm from all persons and must not be located or operating in conjunction with any

other antenna or transmitter. Les antennes utilisées pour ce transmetteur doivent être installé

en considérant une distance de séparation de toute personnes d'au moins 20 cm et ne

doivent pas être localisé ou utilisé en conflit avec tout autre antenne ou transmetteur.
