Re: FCC Class II Permissive change for FCC ID: X4GS00947 (Original Grant Date 29 January 2015)

Dear Sir or Madam:

TASER International is submitting an application for Class II Permissive Change to the Axon Body 2 camera, Model T00064, FCC ID: X4GS00947. The commission on January 29, 2015 originally certified this product under FCC ID: X4GS00947.

To comply with a new management system, the model number of the Axon Body 2 camera system will be changing from T00064 to **AX1001**. There are no circuitry, antenna, or RF related changes made to the product in regard to this model number change.

In addition, TASER has designed a new product called the "Axon Mic". This product is identical in circuitry and size to the Axon Body 2 camera, with the exception of the camera imager and lens removed. Instead of recording MP4 video files, it records MP3 audio files. The proposed model number for Axon Mic is **AX1004**. No antenna or RF related changes have been made in regard to this model number addition.

To summarize, the changes filed under this application are:

- Change the Axon Body 2 model from T00064 to AX1001
- Add the Axon Mic model number AX1004 to the grant

Please contact me if you have any questions or need further information regarding this application.

Sincerely,

Bryan Chiles
