## 1. General Description

## 1.1 General Features

- Module type: 31 pin SMD Type
- Compact dimension: 13 X 11 X 3.0(mm)
- Host Interface : UART for Bluetooth
- Bluetooth 4.1 + EDR compliant
- Supply Voltage: 3.3V This device only supports Bluetootn 3.0 and LE function is disabled.
- Operating temperature range : -40°C ~ +85°C
- 6k-bit OTP for storing board parameters
- Programmable output power control meets Class1, Class2, or Class3 requirements
- Supports Broadcom smartAudio<sup>TM</sup>, wide-band speech,SBC codec, and packet-loss concealment.
- Ultra-low power consumption
- Support serial flash interfaces
- MS915-01/MS184-01/MS184-02/MS941-01/MS201-02/ES90000-04 Compliance
- This module has deployed resistor and inductor and capacitor which are AEC-Q200 qualified.
- This module has deployed BCM89071 which are AEC-Q100 qualified.
- This module has deployed Oscillator which are AEC-Q100 qualifed.
- This module has deployed CRYSTOR and BPF which are AEC-Q200 qualifed.
- This module has use PCB which are SQ qualifed.
- This module uses shield cans of c7521 material.
