

Operational Description

This device is a Wireless-G Exterior Access Point with Power Over Ethernet which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by POE. The antenna are Patch antenna with UFL connector and Omnidirectional Antenna with N-Type connector. Under normal use condition, the user has to keep at least 20cm separation distance between radiator and the body of the user.

The other instruction, please have a look at the users manual.
