

How to Use

- 1 Plug the mains adaptor provided into a wall socket and connect the cable provided to the adaptor.
- 2 Then plug the Type-C connector into the port on your **Duo Juice**® wireless charger. Ensure the power supply is switched on.
- 3 Then simply place your wireless charge compatible devices onto the **Duo Juice**® and charge. You can charge 2 devices at once!
- 4 Make sure your device is placed directly over a +. If the device is not placed correctly on the charger it may not charge. Remove the device off the charger once fully charged.

Average Charge Times

Typical charging times	1-50W		1-101W	
	1-50W	1-101W	1-50W	1-101W
iPhone 12	1h 10 min	1h 10 min	1h 10 min	1h 10 min
iPhone 12 Pro	1h 10 min	1h 10 min	1h 10 min	1h 10 min
iPhone 12 Pro Max	1h 10 min	1h 10 min	1h 10 min	1h 10 min
Samsung S21	1h 10 min	1h 10 min	1h 10 min	1h 10 min

* This wireless charger will charge at its optimum speed when used with a 2.1/2.4 amp or Qualcomm wall adaptor. It is possible to charge with a 1amp adaptor or a computer; but the time to charge your device will slow down dramatically. Charge times may also vary depending on the device.

FCC Information

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause

harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
