

SAR Duty Cycle Letter of Attestation

December 18, 2019

Federal Communications Commission
7435 Oakland Mills Road
Columbia, Maryland 21046

Product: Skydio Beacon **FCC ID:** 2ATQRSBEC1V1

In order to meet FCC SAR compliance, Skydio Beacon will operate at a maximum duty cycle of 10%. This is done over a 60 second period with the transmitter on in pulses only for a max period of 6 seconds and off for the remaining period.

This setting is permanent on the Beacon and is set when the firmware is set at the manufacturing stage.
