Software and Hardware declaration for GE864-PY variant

We, TELIT Communications S.p.A. declares that software version of the GE864-PY module will be different in comparison with the software version of the GE864-QUAD module.

The improvements introduced with the GE864-PY software version will not have any impact on the essential requirement of the R&TTE directive. These software differences will not affect in anyway to the RF, EMC and SAFETY functionality of the GE864-PY module.

We also declare that the hardware difference of the GE864-PY module in comparison with the hardware of the GE864-QUAD module will not have affect in anyway to the RF, EMC and SAFETY functionality of the GE864-PY module. The schematic, PCB and layout of the GE864-PY module are the same of the GE864-QUAD and the only difference is the memory size of 8Mb instead of 4Mb (same package and same pin_out)
