

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', mounted on a blue textured surface. The component is a small, rectangular board with a central yellow square component. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the component's width corresponding to the 10 mm mark and its height corresponding to the 50 mm mark.
Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled '5', mounted on a blue textured surface. The component is a small, rectangular board with a central black square component. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the component's width corresponding to the 10 mm mark and its height corresponding to the 50 mm mark.

Solder Board-Component View 6	 A photograph of a small electronic component, likely a microcontroller or sensor, mounted on a white PCB. The component is positioned on a blue background with a grid pattern. A black ruler with white markings is placed below the component, showing measurements in millimeters. The component has a rectangular shape with various pins and a small label that reads "Z6-TIME-VLS" and "2021117".
Solder Board-Component View 7	 A photograph of a small electronic component, likely a microcontroller or sensor, mounted on a white PCB. The component is positioned on a blue background with a grid pattern. A black ruler with white markings is placed below the component, showing measurements in millimeters. The component has a rectangular shape with various pins and a small label that reads "AM" and "PM".
