BEFORE USE (CONT'D)

Positioning the baby monitor

() CAUTION · Keep the baby units out of the reach of your baby. Never place or mount the baby units inside the baby's crib or playpen.

1. Place the baby units more than 3 feet (1 meter) away from your baby

2. Place the parent unit more than 3 feet (1 meter) away from the baby unit to avoid

The default volume of your parent unit is level 3. If you experience high-pitched screeching noise from your baby monitor while positioning: Make sure your baby unit and parent unit are more than 3 feet (1 meter) apart, OF

Turn down the volume of your parent unit.

Operating range

The operating range of the baby monitor is up to 1,000 feet (300 meters) outdoors or 160 feet (50 meters) indoors. The actual operating range may vary depending on the environmental conditions, and other interferences such as walls, doors, and other obstructions.

CONNECT AND CHARGE THE BATTERY

Install the parent unit battery

The parent unit runs on rechargeable battery or AC power. To continuously monitor your baby, make sure you use both battery and AC power at the same time. With the battery alone, the parent unit can cordlessly run for a short time only.

Use only the battery supplied with this product

If the parent unit will not be used for a long time, disconnect and remove the battery to prevent possible leakage

Replace the battery

To replace the battery, unplug the battery connector from the socket, and then pull the battery out of the battery compartment. Follow the steps above to install the battery.

Connect the baby monitor

■NOTES

- Use only the power adapters supplied with this product.
- Make sure the baby monitor is not connected to an electric outlet that is controlled by a switch. The power adapters' prongs are not designed to hold the weight of your baby monitor. Make sure
- you connect the adapters to wall outlets that are in vertical or floor mount position. Do not connect them to undermount and ceiling outlets. Otherwise, your baby monitor would fall out of the outlets
- Make sure the parent unit, the baby unit and the power adapter cords are out of reach of children

USING THE BABY MONITOR

Power on or off the baby unit

 Press () to power on the baby unit. The power light turns on. DRC Press and hold U to power off the baby unit. The power light turns off.

Power on or off the parent unit

- Press (b) to power on the parent unit. The screen turns on. Press and hold & again to power off the parent unit. The
- screen turns off. NOTE 1

The parent unit powers on automatically once it is connected to power socket or battery installed. The baby unit also powers on automatically once connected to power socket.

Adjust the speaker volume for baby unit

🖹 Note The speaker of baby unit cannot be muted.

Adjust the speaker volume for parent unit

You can adjust the speaker volume from VOLUME 1 to VOLUME 5, or turn it off. The speaker

- volume is preset to VOLUME 3. Press VOLUME A when the parent unit is not in use
- When the speaker volume is set to **VOLUME OFF**, the screen displays **Q**.

Adjust the sound sensitivity of the baby unit

You can choose to hear sounds from the baby unit all the time, or to hear sounds that exceed a certain level. You can use the parent unit to adjust the microphone sensitivity of your baby unit. The higher the sensitivity level, the more sensitivity level the more sensitivity level the more sensitivity level is preset to HIGHEST.

VOX Sensitivity level	HIGHEST	нібн	MEDIUM	LOW	LOWEST
Description	The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screeching sounds from your baby. It remains quiet when your baby makes soft sounds.

Charge the parent unit battery

When you have connected the parent unit and installed its battery for the first time or after power outage, the parent unit powers on automatically. The battery icon indicates the battery status (see the following table)

NOTES

- The parent unit battery is fully charged after 11 hours of continuous charging.
 It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging.
- The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery.

The battery icon is off.	No battery is installed but operates using AC power.	Install the parent unit battery. Charge without interruption (at least 30 minutes).
The screen displays LOW BATTERY and The Ight flashes.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid (118 .	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.

2 BEFORE USE

Test your baby monitor

You may test the baby monitor before initial use, and at regular times thereafter

1. Make sure your baby unit and parent unit are on. 2. Speak towards the microphone of the baby unit. 612 1. You will hear the sound at the parent unit, and see the visual sound indicators light up. CAUTION For hearing protection, make sure the parent unit is more

than 3 feet (1 meter) away from the baby unit. If you hear any high-pitched noise, move the parent unit further until the noise stops. You can also press 🔻 VOLUME on the parent unit to lower or mute the noise

NOTE

This baby monitor is intended as an aid. It is not a substitute for proper adult supervision, and should not be used as such.

When the parent unit displays **NOT LINKED** and \overline{T} flashes, move the parent unit closer to the baby unit (observe the minimum distance of 3 feet/1 meter). You can also check if the baby monitor is connected to a live nower socket and switched on

-1'- TIP

^Q_{*}, Frequently asked questions

Below are the questions most frequently asked about the baby monitor. If you cannot find the answer to your question, visit our website at www.vtechphones.com or call 1 (800) 595-9511 for customer service. Why does the baby monitor not Try the following (in the order listed) for common cure:

respond normally?	 Disconnect the power to the baby unit and the parent unit. 			
	Remove the batteries in the parent unit. Then, install the batteries again.			
	3. Wait a few minutes before connecting power back to the baby unit and the			
	parent unit.			
	Turn on the baby unit and the parent unit.			
	Wait for the parent unit to synchronize with the baby unit. Allow up to one minute for this to take place.			
Why doesn't the screen of the parent unit go on when I switch on the unit?	Perhaps the rechargeable battery of the parent unit is empty and the parent unit is not connected to the power. Insert the appliance plug into the parent unit and put the adapter in a wall socket.			
Why doesn't the POWER light of the baby unit go on when I switch on the unit?	Perhaps the baby unit is not connected to the power. Connect the baby unit to the power.			
Why does the baby monitor produce a high-pitched noise?	The units may be too close to each other. Make sure the parent unit and the baby unit are more than 3 feet (1 meter) away from each other.			
Why does the parent unit react too quickly to other sounds?	The baby unit also detects other sounds than those of your baby. Adjust the VOX sensitivity level to a lower level or adjust the speaker volume on the parent unit.			
Why don't I hear a sound/Why can't I hear my baby cry?	The volume of the parent unit may have set too low. Press ${\rm VOLUME} \blacktriangle$ to increase the volume level.			
	You may have set a low VOX sensitivity level. See Adjust the sound sensitivity of the baby unit to change the setting.			
Why does the parent unit beep?	If the sound alert feature is on, there is sound detected from the baby unit.			
	The baby unit may be out of range. Move the parent unit closer to the baby unit (but not less than 3 feet).			
	If the parent unit is powered by the provided battery, it may not have enough charge for the parent unit to perform normally. Charge the battery in the parent unit for up to 11 hours.			
Why can't I establish a connection? Why is the	The baby unit may be out of range. Move the parent unit closer to the baby unit (but not less than 3 feet).			

connection lost every now and Other electronic products may cause interference with your baby monitor. then?
