The screenshot displays the Keysight E67 Series software interface, showing a power spectrum plot. The plot displays two curves: a red curve representing the 'Center Frequency' and a blue curve representing the 'Offset'. The x-axis is labeled 'MHz' and ranges from 0 to 20.000 MHz. The y-axis is labeled 'dBm' and ranges from -100 to 10. The plot shows a significant drop in power at approximately 10 MHz. The interface includes a top menu bar with 'File', 'Edit', 'View', 'Tools', 'Help', and 'Window'. A left sidebar contains 'Metrics' and '2 Graph'. The right sidebar contains 'Settings' and 'Frequency'. The bottom status bar shows 'Dec 29, 2021 1:08:52 PM' and 'Info BW 50.000 MHz'.
