

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	
EUT Housing and Board View 2	

EUT Housing and Board View 3	 A photograph showing the internal components of a white electronic device housing. The device is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the device's length spanning approximately 30 to 40 mm. The internal components include a yellow battery and a green printed circuit board (PCB) with various electronic components.
EUT Housing and Board View 4	 A photograph showing the internal components of a white electronic device housing, viewed from a different angle than View 3. The device is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the device's length spanning approximately 30 to 40 mm. The internal components include a yellow battery and a green printed circuit board (PCB) with various electronic components.

Solder Board-Component View 1	 A photograph showing a small, circular, yellow solder component on a blue textured surface. A ruler is placed below the component for scale, showing measurements in millimeters. The component is positioned near the 10 mm mark on the ruler.
Solder Board-Component View 2	 A photograph showing a small, rectangular, blue solder component on a blue textured surface. A ruler is placed below the component for scale, showing measurements in millimeters. The component is positioned near the 10 mm mark on the ruler.

Solder Board-Component View 3	 A microscopic view of a small, rectangular blue solder board component. The component is positioned on a blue, textured background. A millimeter ruler is visible in the foreground, showing measurements from 0 to 100 mm. The component is located between the 10 mm and 20 mm marks on the ruler.
Solder Board-Component View 4	 A microscopic view of a small, rectangular green solder board component. The component is positioned on a blue, textured background. A millimeter ruler is visible in the foreground, showing measurements from 0 to 100 mm. The component is located between the 10 mm and 20 mm marks on the ruler.

Solder Board-Component View 5	 A microscopic view of a solder joint on a circuit board component. The component is a small, rectangular, green printed circuit board (PCB) with various electronic components, including a central integrated circuit (IC) and several surface-mount components. The component is positioned on a blue, textured surface. A black ruler with white markings is visible in the background, showing measurements in millimeters (mm) and centimeters (cm). The ruler is oriented vertically, with the 0 mm mark at the top and the 100 mm mark at the bottom. The component is located approximately 10 mm from the top edge of the ruler.
Solder Board-Component View 6	 A microscopic view of a solder joint on a circuit board component. The component is a small, circular, yellow component with a black wire and a red wire attached to it. The component is positioned on a blue, textured surface. A black ruler with white markings is visible in the background, showing measurements in millimeters (mm) and centimeters (cm). The ruler is oriented vertically, with the 0 mm mark at the top and the 100 mm mark at the bottom. The component is located approximately 10 mm from the top edge of the ruler.
