GETTING STARTED

Battery charging

The tablet has a built-in rechargeable Li-polymer battery. To charge connect the AC power adapter to the USB jack on the left side of the tablet and the battery icon shows the battery status and charging status.

The tablet can be used even if the battery is being charged. No replacement of battery without authorization, or the explosion hazard might happen. Recharge it for at least half hour if it has been idle for long time and fails to start itself. Regularly recharge it at least one time monthly. 35° - 5° is the optimum temperature for the battery recharging or the battery performance might deteriorate slightly.

WARNINGS

	Correct disposal of this Product (Waste Electrical & Electronic Equipment) (WEEE). Your product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end of-life should be disposed of separately from your household waste. Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products. Please help us to conserve the environment we live in!
	DO NOT place objects on top of the device, as objects may scratch the device.
	DO NOT expose the device to dirty or dusty environments.
	DO NOT place the device on an uneven or unstable surface.
	DO NOT insert any foreign objects into the device.
	DO NOT expose the device to strong magnetic or electrical field.
	DO NOT expose the device to direct sunlight as it can damage the device. Keep it away from heat sources.

User guide
T1021P/T

	DO NOT store your device in temperatures higher than 40°C (104°F). The internal operating temperature for this device is from 20°C (68°F) to 60°C (140°F).
	DO NOT use the device in the rain.
	Please check with your Local Authority or retailer for proper disposal of electronic products.
	The device and adaptor may product some heat during normal operation of charging. To prevent discomfort or injury from heat exposure, DO NOT leave the device on your lap.
RATING	POWER INPUT RATING: Refer to the rating label on the device and be sure that the power adaptor complies with the rating. Only use accessories specified by the manufacturer.
	Clean the device with a soft cloth. If needed, dampen the cloth slightly before cleaning. Never use abrasives or cleaning solutions.
	Always power off the device to install or remove external devices that do not support hot-plug.
	Disconnect the device from an electrical outlet and power off before cleaning the device.
	DO NOT disassemble the device. Only a certified service technician should perform repair.
	The device has apertures to disperse heat. DO NOT block the device ventilation, the device may become hot and malfunction as a result.

User guide
T1021P/T

	Risk of explosion if battery replaced by an incorrect type. Dispose of used batteries according to the instruction.
	PLUGGABLE EQUIPMENT: the socket-outlet shall be installed near the equipment and shall be easily accessible.
	European Union: Disposal Information. This symbol means that according to local laws and regulations your product and/or its battery shall be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities. The separate collection and recycling of your product and/or its battery at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.
