Charge for 24 hours before using. 		Cargue por 24 horas antes de usar. 	
Get to know your Logic phone. 		Conozca su teléfono Logic. 	
Copy music files from your computer to your Logic phone. 		Transfiera sus archivos de música desde su computadora a su teléfono Logic. 	
FCC Statement 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (a) This device may not cause harmful interference. (b) This device must accept any interference received, including interference that may cause undesired operation. 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. SAR Information Statement Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on scientific studies. The standards include a substantial safety margin designed to ensure the safety of persons, regardless of age and health. The exposure standard for wireless mobile phones and use is a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 Watts/kg. Tests for SAR are conducted with the phone transmitting at its highest certified power level at tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is		LOGIC 6.6" 4G SMARTPHONE QUICK GUIDE GUÍA RÁPIDA

Body-worn Operation The device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. The party holds, holders, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
