Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED Transceiver with
FCCID: **ABZ99FT3049**

A permissive change is requested for this MOTOROLA VHF 25-52 Watt Mobile Radio
(the subject transceiver) which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

Motorola has removed Restricted Materials from some components to make the radios compliant to Environmental Preferred Parts (EPP) per 12G02897W18, Controlled, Restricted and Reportable Materials Disclosure (Rev, H, Appendix C, Section 2) and 12G13933A12, Component Temperature Requirements To Support "PB-Free" Solder.

B. PERFORMANCE DIFFERENCES:

Performance data on Radiated Spurious Emissions was obtained in accordance with 47 CFR 2.1053. The performance measurements were performed at the Motorola Plantation Facility OATS, which is an FCC listed site. Attached results shows that the Radiated Spurious Emissions (Exhibit 6G (Revised)) is within the FCC limit and better than the original filing. However, the Conducted Spurious Emissions (Exhibit 6F (Revised)) is degraded in comparison to the original filing but within FCC limits.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted. Due to the Conducted Spurious Emissions degraded to those originally reported, thus this change requires a Class-2 Permissive Change.

Sincerely,
