SUBJECT: ACER Communications & Multimedia Inc.
FCC ID: JVPH0522
FCC E911 Requirements Per §22.921

Gentlemen:

Acer Communications & Multimedia Inc. hereby certifies that the analog cellular telephone (FCC ID: JVPH0522), using the Automatic A/B Roaming - Intelligent Retry method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a "9-1-1" call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you have any questions or comments concerning the above, please contact the undersigned.

AFFIDAVIT FOR ESN PROTECTION OF CELLULAR MOBILE TELEPHONES

We hereby certify that the Handheld Portable Cellular Telephone (FCC ID: JVPH0522)

is so designed that it complies with all the requirements for ESN protection specified in Section 22.919 of the FCC Rules.

a) The transmitter in service has a unique ESN.

b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.

c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely,

A handwritten signature in black ink, appearing to read "William Tseng", written over a horizontal line.

Protection of Electronic Serial Number (ESN)

Each portable phone has a unique Electronic Serial Number (ESN) which is ensured by factory procedures. The ESN is stored in a Flash memory, which is permanently solder to the circuit board. The ESN is isolated from fraudulent contact and tampering by the physical packing of the phone and by the password scheme. The ESN contains other information, we use Cyclic coding and spreading of ESN bits over various non-sequential memory locations to verify the validity of the stored ESN.

To whom it may concern:

We Acer Peripherals, Inc. (API), hereby authorize PCTEST Engineering Laboratory Inc., to act on our behalf in all matters relating to applications for equipment authorization, including the signing of all documents relating to these matters. Any and all acts carried out by PCTEST Engineering Laboratory, Inc. on our behalf shall have the same effect as acts of our own.

We also hereby certify that no party to this application is subject to a denial of benefits, including FCC benefits, pursuant to Section 5301 of the Anti-Drug Act of 1988, 21 U.S.C. 862.

**In re: Acer Peripherals, Inc.
FCC ID: JVPH0522**

Request for Confidentiality

Gentlemen:

In accordance with the 0.459 of CFR 47, Acer Peripherals, Inc. (API) hereby requests confidentiality of the (Block Diagrams, Circuit Diagrams, Circuit Description, Parts List, Tune-Up Procedure, Operational Description attachments for the subject application.

These documents contain detailed system and equipment description and related information about the product which API considers to be proprietary, confidential, and a custom design and, otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, API considers that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give competitors an unfair advantage in the market.

Sincerely,

Chang-Chih Su
