

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone, specifically the battery and the back housing. The battery is a Li-ion Polymer Battery with a capacity of 4000mAh (18.88Wh) and a voltage of 3.87V. It is labeled with the model BL-A56C7 and the manufacturer JBLA36CF90031. The back housing is black and has the number '65' written on it. A ruler is placed next to the components for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of a mobile phone, specifically the battery and the back housing. The battery is a Li-ion Polymer Battery with a capacity of 4000mAh (18.88Wh) and a voltage of 3.87V. It is labeled with the model BL-A56C7 and the manufacturer JBLA36CF90031. The back housing is black and has the number '65' written on it. A ruler is placed next to the components for scale.

Solder Board-Component View 1	 A photograph of a small, rectangular electronic component, likely a solder board, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left and a horizontal scale at the bottom. The component is oriented horizontally, with its longer side parallel to the horizontal ruler. The component itself is dark with various gold-colored solder points and components visible. The ruler markings are in millimeters.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing its underside. It is placed on the same blue textured surface next to the same black ruler. The component is oriented horizontally, with its longer side parallel to the horizontal ruler. The underside shows various components, including what appears to be a larger square component in the center. The ruler markings are in millimeters.

Solder Board-Component View 3	 A photograph of a mobile phone motherboard (Solder Board-Component) from View 3. The board is black with various electronic components, including a large central chip, smaller chips, and connectors. It is placed on a blue textured surface. A white ruler with black markings is visible on the left and bottom, showing measurements in millimeters (0 to 70 mm on the left, 0 to 90 mm on the bottom).
Solder Board-Component View 4	 A photograph of the same mobile phone motherboard from View 4. This view shows the SIM card slot and other components. The board is placed on the same blue textured surface. A white ruler with black markings is visible on the left and bottom, showing measurements in millimeters (0 to 70 mm on the left, 0 to 90 mm on the bottom).
