RE: BenQ Corporation

FCC ID: JVPAWL400

After a review of the submitted information, I have a few comments on the above referenced Application. These comments are all made upon the assumption that the EUT's full conducted output power is 16.1 mW and the antenna gain is 1.3 dBi.

- 1) Please provide a new label that includes the FCC Logo and the phrases "Tested to Comply With FCC Standards" and "FOR HOME OR OFFICE USE". If the device is too small than the logo must still appear on the label and the additional phrases must be presented in the manual (an updated label with the FCC logo is still required). Please update the label and/or manual to include this information as appropriate.
- 2) After the change in output power, the spurious emissions should have been checked to ensure there is not an adverse affect to the previous readings on these. Please comment.
- 3) Please provide an updated RF exposure exhibit using the new reduced power.
- 4) Please remove reference to the 20 cm distance in the RF exposure statements in the users manual. Please note that reference to the 20 cm appears 3 times in the new updated manual information provided.
- 5) The Statement of Compliance page must also include the information specified in item (2) given below. Note that all information required on the compliance sheet must be on a single page. This information was not included on same page as the compliance page provided.

COMPLIANCE INFORMATION (47CFR 2.1077)

If a product is tested and authorized under a Declaration of Conformity, a compliance information statement shall be supplied with the product at the time of marketing or importation, containing the following information:

- (1) Identification of the product, i.e. name and model number.
 - (2) A statement similar to that contained in Section 15.19(a)(3) that the product complies with Part 15 of the regulations.
 - (3) The identification, by name, address and telephone number, of the responsible party. The responsible party is defined as either the manufacturer, or if the equipment is imported, the importer. The responsible party for a Declaration of Conformity must be located within the United States.
- 6) FYI, Proposed grant conditions
- Power output listed is conducted. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter. End-users must be provided with specific operating instructions for satisfying RF exposure compliance.
