Subject: W1837 integration for BKR9000 FCC ID# K95BKR9000-2

To Whom It May Concern:

BK Technologies acknowledges that the integration and data re-use of a certified module is permitted. We have integrated the WL18MDGI module from Texas Instruments (FCC ID:Z64-WL18DBMOD IC ID:451I-WL18DBMOD) into our BKR9000 radio. We confirm that we have made no modifications to the module hardware, and that the performance data of the products test report is representative of current performance. However the module's configuration file has been modified to prevent operation in the U-NII-2A and U-NII-2c bands.

Please contact me if there is any information you may need.

Sincerely,

MAY 26, 2023

Lorenzo Cruger Jr.
VP of Engineering
BK Technologies
