1.Description

The device is a standalone access control and proximity card reader which supports EM & MF card types. It builds-in STC microprocessor, with strong anti-interference ability,high security and reliability,powerful function and convenient operation. It's widely used in high-end buildings, residential communities and other public places.

2.Features

| Ultra-low Power | Standby current is less than 30mA |
|--------------------------|--|
| Wiegand Interface | WG26 or WG34 input and output |
| Searching time | Less than 0.1s after reading card |
| Backlight keypad | Operate easily at night |
| Doorbell interface | Support external wired doorbell |
| Access ways | Card, Pin code, Card & Pin code |
| Independent codes | Use codes without related card |
| Change codes | Users can change codes by themselves |
| Delete users by card No. | The lost card can be deleted by keyboard |

3. Specifications

| Working Voltage: DC12V | Standby Current: ≤30mA | |
|---------------------------------|-------------------------------------|--|
| Card Reading Distance: 2 ~ 5cm | Capacity: 2000 users | |
| Working Temperature: -40°C~60°C | Working Humidity: 10%~90% | |
| Lock output load: ≤3A | Door Relay time: 0~99S (Adjustable) | |

4.Installation

Drill hole according to the size of the device and fix the back shell with the equipped screw. Thread the cable through the cable hole. connect the wires according to your required function, and wrap the unused wires to avoid short circuit. After connecting the wire, install the machine. (as show below)

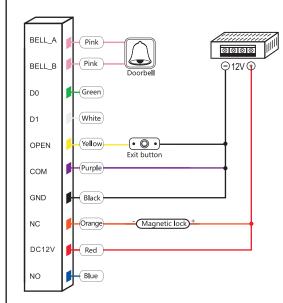

5. Wiring

| Color | ID | Description | |
|--------|--------|---|--|
| Green | D0 | Wiegand Input(Wiegand Output in Card Reader Mode) | |
| White | D1 | Wiegand Input(Wiegand Output in Card Reader Mode) | |
| Yellow | OPEN | Exit Button input terminal | |
| Red | +12V | 12V + DC Regulated Power Input | |
| Black | GND | 12V - DC Regulated Power Input | |
| Blue | NO | Relay normally-on terminal | |
| Purple | COM | Relay Public terminal | |
| Orange | NC | Relay normally-off terminal | |
| Pink | BELL_A | Doorbell button one terminal | |
| Pink | BELL_B | Doorbell button to the other terminal | |

7.Sound & Light indication

| Operate Status | LED Light Color | Buzzer |
|---------------------------|------------------|----------------|
| Standby | Red | |
| Keypad | | Веер |
| Operation Successful | Green | Beep- |
| Operation Failed | | Beep-Beep-Beep |
| Entering into Programming | Flash Red Slowly | Beep- |
| Programmable Status | Orange | |
| Exit Programming | Red | Beep- |
| Door Opening | Green | Beep- |

8. Advance setting

| | Add Users | | Notes | |
|---|----------------------------------|--|---|--|
| | Change Master code | * Master code # 0 New code # New code # | Default factory master code is 999999. | |
| | | | | |
| | Add card | * Master code # 1 Read card # # | Cards can be added continuously | |
| 1 | Add card number | * Master code # 1 8 digits or 10 digits # | Card number can be addec continuously | |
| | Add ID number+ card | * Master code # 1 ID number # Read card # | Add user with specify ID number, easily find and delete. | |
| | Add ID number+ card number | * Master code # 1 ID number # 8 digits or 10 digits # | Add user with specify ID number, easily find and delete. | |
| | Add PIN code | * Master code # 1 ID number # 4 digits Pin code # | ID number is from 1-2000 | |
| | Delete Users | | | |
| 2 | Delete card | Master code # 2 Read card or 8 digits or 10 digits # | Cards can be deleted continuously | |
| | Delete ID number | * Master code # 2 ID number # | When the card is broken or lost, you can delete the user by ID number | |
| | Delete ALL users | * Master code # 2 0000 # | Delete ALL PIN code & card users except public PIN code | |

| | Access ways | | | |
|---|---|--|---|--|
| 3 | By card | * Master code # 30 # | Only the card user could unlock the door, keypad is invalid | |
| ľ | By card+ PIN code | * Master code # 31 # | To enable this function, the user PIN code has to be changed. | |
| | By card or PIN code | * Master code # 32 # | Both card user and PIN user could unlock the door (factory default) | |
| 4 | Relay Output Delay Time | | | |
| | Door relay strike time | * Master code # 4 0 ~ 99 # | Door opening time range: 0-99s Default 5s | |
| | Working Mod | des | | |
| | Standalone access control mode | * Master code # 50 # | The door will be locked automatically after open the door normally | |
| 5 | Relay toggle mode | * Master code # 51 # | The door will not be locked automatically. To lock the door, the user has to read the card or press the exit button. | |
| | Reader mode | * Master code # 52 26/34 # | WG26/34 input and output | |
| 6 | Bind a code to an inva l id card | * Master code # 6 Read card 4 digits code # | When using card+code to unlock the door | |
| | Data Backup | | | |
| 7 | Data backup input | * Master code # 71 # | The device will receive the data. | |
| | Data backup output | * Master code # 70 # | Send the data to external device. | |
| | WiFi matching | * Master code # 73 # | WiFi match(optional) | |
| 9 | Add public code | * Master code # 9 4 digits code # | Only one public code is available. Delete public code: * Master code # 9 # | |

| _ | | |
|---|--|---|
| * | Change the code by user card | * Read card New code # Repeat new Code # |
| | Change the code by ID number added | * [ID number] #] Old code [#] New code [#] Repeat new Code [#] |
| | Reset to Factory Default | Power off, press the exit button continuously, power on, the indicator light turns orange, swipe the first card as for master add card, swipe the second card as for the master delete card, hearing beep-beep-beep- the master code has been reset to 999999, factory default settings are successful. |
| | | Power off, power on, the indicator light turns orange,press #, swipe the first card as for master add card, swipe the second card as for the master delete card, hearing beep-beep-beep- the master code has been reset to 999999, factory default settings are successful. |
| | | ★Registered user data won't be deleted when reset to factory default |

9.Master Card Operation

9.1 Add Card

Read master add card Read the 1st user card Read the 2nd user card ...

Read master add card

Note: The master add card is used to add card users continuously and quickly. When you read the master add card at the first time, you will hear short "BEEP" sound twice and the indicator light turns orange, it means you have entered into add user programming. When you read the master add card at the second time, you will hear long "BEEP" sound once and the indicator light turns red, it means you have exited the add user programming.

V6.1

9.2 Delete Card

Read master delete card Read the 1st user card Read the 2nd user card

Read master delete card

Note: The master delete card is used to delete card users continuously and quickly. When you read the master delete card at the first time, you will hear short "BEEP" sound twice and the indicator light turns orange, it means you have entered into delete user programming. When you read the master delete card at the second time, you will hear long "BEEP" sound once, the indicator light turns red, it means you have exited the delete user programming.

10.Data Backup Operation

Example: Backup the data of machine A to machine B

The green wire and white wire of machine A connects with the green wire and white wire of machine B correspondingly, set B for receiving mode at first, then set A for sending mode, the indicator light turns green flash during the data backup, data backup is successful when indicator light turns red.

* Master code # 71 # Set B for receiving mode firstly

* Master code # 70 # Set A for sending mode secondly

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception.

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
