7435 Oakland Mills Rd

Columbia MD 21046-1609

SUBJECT: Class II Permissive Change for FCC ID: **RAS-MT7922A12L**

The intention of this application is to enable the modular FCC ID:
RAS-MT7922A12L, granted on **11/11/2021** for **DSS**, **05/09/2022** for **DTS/NII**,
08/04/2022 for **6XD** to be integrated in **Lenovo Notebook Computer,** Model:
TP00145B. And will be permanently disabled the Wi-Fi 5GHz UNII-4 band operation
by software. It cannot be enabled/overridden by end users or unauthorized 3rd parties
via any other mean.

The module installed into host platform mentioned above is electronically and
mechanically identical to the original certified module. The Original FCC testing on
module under FCC ID: **RAS-MT7922A12L** was performed with an antenna of higher
gain, and the antenna was connected to the module in an open environment. The
current host platform under application uses an antenna of the same type but of lower
gain and is installed inside the host platform enclosure. The physical restraints
introduced by the host platform should have resulted in equal or lower level of
radiated emission. Therefore, additional Radiated emission testing is not necessary.
Software security remains unchanged from the original application.

Except for the change above, the design, hardware and implementation are exactly
same with original.

Sincerely yours,

Stella Chang
