### Non-metal mailbox installation

1. Pull the tabs on the side of your sensor to remove the back cover.

- **2.** Flip the switch in the battery compartment away from the octagon marking.
- 3. Insert the three included AAA batteries.

4. Reattach the back cover.

**5.** Mount your sensor on the inside of the mailbox lid with an included adhesive.

#### Metal mailbox installation

1. Pull the tabs on the side of your sensor to remove the back cover.

- **2.** Keep the switch in the battery compartment flipped toward the octagon marking.
- 3. Insert the three included AAA batteries.

- 4. Reattach the back cover.
- 5. Drill a hole through your mailbox with a 5/16 in (8 mm) drill bit.

**NOTE:** The antenna requires a gap or hole in your mailbox to connect to your sensor once it is installed.

### ring

6. Insert the antenna cable through the gap or hole in your mailbox.

**9.** Mount the hexagonal end of the antenna to the outside of your mailbox with an included adhesive.

7. Plug the antenna into your sensor.

**10.** If you drilled a hole, wrap the included grommet around the cable and plug the hole.

8. Mount your sensor on the inside of the mailbox lid with an included adhesive.

**11.** Manage the cable with the included cable management system.

1. Slide your sensor off the mount to remove.

2. Unplug the antenna, if attached.
