

March 7, 2003

- 1) See updated document.
- 2) See updated schematics.
- 3) HDC-10 headset uses the same connection to the phone as the HDE-2 headset. The only difference between the headsets is the retractibility of the HDC-10 earpiece when not in use. The functionality between the two headsets as far as the interface to the phone is identical.
- 4) LPS-3 uses the same connection to the phone as the HDE-2 headset. A separate test is not required in this case.
- 5) The EMC and SAR facilities used different methods for measuring the conducted RF power. This has been corrected, and an updated measurement is in the new EMC report.
- 6) – 14) See updated EMC report.
