

EXHIBIT 2 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a small electronic device (EUT) housed in a black plastic casing. The device is open, revealing a green printed circuit board (PCB) with various electronic components, including a microcontroller, resistors, and a small antenna. A circular silver-colored component, likely a battery or a sensor, is visible on the right side of the casing. A black ruler is placed horizontally below the device, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 1	 A close-up photograph of a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is labeled "S11511462" and "DATE 2020.4.29". It features two large, square, gold-colored components, possibly LEDs or sensors, and several smaller components, including resistors and capacitors. A black ruler is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, likely a USB-to-UART bridge, placed on a blue surface. The component is L-shaped and features various electronic components including a USB connector, a microcontroller, and several surface-mount components. It is positioned next to a black L-shaped ruler with white markings in millimeters (0-100 mm) and centimeters (0-10 cm).
Battery View	 A photograph of a blue cylindrical lithium-ion battery placed on a blue surface. The battery has a white label with the text "HW 18650 3.7V 1800mAh 6.65Ah 200805 0236Z". Three wires (red, yellow, and black) are connected to the positive terminal of the battery. The battery is positioned next to a black L-shaped ruler with white markings in millimeters (0-100 mm) and centimeters (0-10 cm).
