This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not properly installed and used, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is advised to try one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to a different power outlet, or
- Consult the equipment dealer or a qualified radio/television technician for additional suggestions.

If these measures do not resolve the problem, the user should stop using the equipment until the problem has been resolved.

- Connect the equipment into an outlet on a circuit different from that which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressed or implied by the FCC. If the FCC requires changes, such modifications could void the warranty.

The device has been evaluated with FCC's RF exposure requirement. The equipment complies with FCC's RF exposure limits set forth for uncontrolled environments. The device and its antenna(s) must not be co-located or in close proximity with any other antennas or transmitters.
