

Dear Tim,

About Comment No. 7, I just uploaded another revised test report to your website, please check.

And about No. 9, could you please let me know what kind of statement or document should we provide?

And No. 12, the two sections are also use the same method (3), but the VBW of section 6.3 is 300 KHz, and section 12.3 is 1 MHz, can it be down?

Thank you very much.

Best Regards,
Ivy
