Trouble shooting

If the following “actions” do not solve your problem, please stop using this product and contact the dealer who purchased the product.

1. The audio system cannot be powered on?
Please check if there is power to the audio system. If there is no power, please charge it properly before turning it on.

Unable to connect?

Check if the audio system is in the power on state or model. 2. Open the Bluetooth device again and search for the audio model AD-01. Click to connect to connect. If there are too many Bluetooth devices nearby, causing search difficulties, other Bluetooth devices can be turned off first.

3. Is the sound intermittent?

Check if the audio system and Bluetooth device exceed the effective distance, or if there are any obstacles that block the signal between them.

4. Is the sound too low?

Check the volume setting of the Bluetooth device and adjust its volume to the appropriate size.

Precautions

1. Do not bump, squeeze, puncture or disassemble the product on your own.
2. Intensely containing batteries, please do not use this product in extreme environments such as high temperature, cold, steam, corrosion, etc.
3. Do not use high voltage and current devices to charge this product to avoid danger.

The pictures within the manual are for reference only. The actual product (including color, shape, etc.) subject to the actual product.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
