Battery Charging

When the battery is low, the red indicator will light up, please use the supporting USB cable to charge it in time. If you continue to print, the printer may automatically shut down.

⚠ **Note:**

Can use a power adapter or computer USB power to charge, shipped without an adapter. If consumers use a power adapter to charge, they should purchase a power adapter that is certified by CE&FCC and meets the requirements of the standard. If the user replaces the battery with the wrong model, there is a risk of explosion. Please be sure to return the used battery to the repair site according to the instructions.

Matters needing attention

1. The best working temperature of the printer is 0°C~45°C, such as the ambient temperature is too low or too high, may affect the print quality.

2. Do not use unofficial power adapters and paper rolls to ensure print quality.

3. The printing head will heat during the printing process, do not touch the printing head to avoid burns.

4. Do not forcibly pull out the paper during the printing process, so as not to damage the printer.

5. If you change the incorrect model of the battery pack will have the risk of explosion.

6. Please do not put the battery into the fire or heating furnace, do not mechanically squeeze or cut the battery for disposal.

7. Please do not place the battery in an extremely high temperature environment that may cause the battery to explode or leak flammable liquids or gases.

8. Please do not place the battery in an extremely low pressure that may cause the battery to explode or leak flammable liquids and gases.

⚠ **Note:** The tearing blade has a sharp edge, please be careful not to touch it to prevent cuts.

⚠ **Warning:** The print head is a hot part. Do not touch the print head and surrounding parts during the printing process or just after the printing. Children must use it under adult supervision.

⚠ **Warning:** do not touch the thermal print head surface and connector. Avoid electrostatic damage to the print head.

⚠ **Warning:** In the residential environment, running this device may cause radio interference.

Frequently asked questions

Q: Can I charge it when it is off?

A: Yes! Plug in the Type-C USB charging cable in the off state, and the machine will wake up and charge automatically.

Q: How do I download the APP?

A: You can find the QR code scanning APP in the instructions inside the box or on the outside of the box

Q: What about the offset of the printed content?

A: Turn on the machine and recenter the roll.

Q: The printer does not run paper?

A: Restart the machine and print again (may be caused by program loss), or check whether the print head and the roller are adhesive.

Q: Print blurry?

A: Wipe the print head, or choose high concentration printing when APP printing, or the machine may be low power.

Q: Can I print during charging?

A: It can be printed normally during charging.

Q: Why is the red light still on when the paper roll is loaded?

A: Put in the paper roll to pull out a piece to reach the roller position and then close. If the roller position is still not good, please clean the paper sensor.
