RE: Giga-Byte Technology Co., Ltd.

FCC ID: JCK-GN-B46B

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The users manual (page 2 of 40) mentions the use of shielded cables, however this device appears to have been tested with unshielded cables. Additionally, page 8 of 40 of the users manual does not appear to address shielded or unshielded cables. Please explain and correct the users manual if necessary.
- 2) Page 31 of 32 (page 71) mentions the output power as 15 dBm. However the measured output power was 19.0 dBm. This is significantly greater than that specified in the users manual. Please explain.
- 3) The same concerns above also exist in the users manual for the 2<sup>nd</sup> model.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
