

6.5.4 20dB Bandwidth

Result: The 20dB bandwidth was found to be less than 1 MHz across all channels as required. Results are shown below in Table 6.5.4-1 and a plot of the channel with the greatest bandwidth is shown in Figure 6.5.4-1.

Table 6.5.4-1: 20dB Bandwidth

Channel	Frequency (MHz)	20dB Bandwidth (kHz)
Low	2402	187.50
Center	2441	192.36
High	2480	188.19
