Bay Area Compliance Laboratory Corporation
230 Commercial Street
Sunnyvale, CA 94085

Dear Application Reviewer,

This letter is to request a Class II Permissive change to the REMEC amplifier DPA4040E. This product has been approved originally under the FCC ID: I2ODPA4040E.

The purpose of this Class II Permissive change is to show FCC compliance specifically using a Nortel S8000 Base Transceiver Station (BTS) with FCC ID: AB6S8000. The Nortel S8000 BTS provides both the signal source at the input of the DPA4040E and transmit filtering requirements at the output of the DPA4040E.

Regards,

Scott Rumery
Director of Engineering
REMEC, Inc.
