Attestation Statement for SAR Simulation

This attestation statement is to confirm that the simulated fields of the reference model (ANSYS simulated values) and the OEM model have been verified for our final product. Good correlation has been observed between both the reference and simulated WPT models and thus provide an accurate assessment of the Specific Absorption Rate (SAR) emanating from the EUT mentioned below:

Model: WIZ022
FCC ID: K7SWIZ022

Sincerely yours,

Name and Title: Zack Vogel / Sr. Regulatory Compliance Engineer
