

Radiar AFD1

Radiar AFD1 is a BLE5.2 controllable, Nordic based DALI controller. It operates on 90-277 VAC input voltage range and can be connected to 1 DALI LED driver. This device also has a 12 VDC auxiliary output to power the sensors.

1. Features

- DALI supporting up to 1 slave device
- BLE5.2 based non-flooding intelligent communication
- 12 VDC auxiliary output
- Zero downtime Over-the-Air (OTA) firmware updates
- Compact form factor for easy integration into luminaires

7. Warning

1. To prevent the device from any defect, please handle and store it with care.
 - Do not drop or give shock.
 - Do not store in very humid location or at extreme temperature.
 - Do not open or disassemble the product.
2. Static electricity or surge voltage may damage the components inside device, as such please observe proper anti-electrostatic working process.
 - People handling the device should be well grounded (e.g. using ESD wrist band) and wear antistatic working clothes and gloves.
 - All related devices and instruments in the production line should be well grounded (e.g. working table, measuring equipment, assembly jigs).
3. Observe the correct polarity of output terminal.
4. Avoid input voltage exceeds the maximum rating, which will cause damage to the circuit and result in malfunction.
5. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
6. Refer all servicing to qualified personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
7. To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture. The apparatus shall not be exposed to dripping or splashing and that objects filled with liquids, such as vases, shall not be placed on apparatus.

8. To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instruction.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
