- Antenna is located in the PCB board or the middle position (long-bar headphones): (units: mm)

The antenna is optimally placed in the middle area, and at least one row of through holes around the clearance area is optimally required.

- When the antenna is located at the edge of the PCB board (in-ear headphones and some long-bar headphones) :

The antenna is optimally placed on the edge of the PCBA; the antenna and its alignment are set on a single layer.

Design criteria: :

1. The dimensions in the diagram are for reference only; the actual dimensions are optimized for different versions.
2. The optimum clearance area around the need for at least a row of holes, aperture 0.3 mm, and other PCBA circuit or material isolation.
