PY7-34424G Data Reuse Justification and Summary

To Whom It May Concern:

We are applying data reuse for FCC ID: PY7-34424G (variant) based on the parent model FCC ID: PY7-83262V (Parent) and FCC ID: PY7-24116L (Sibling).

Regarding WLAN/Bluetooth/WPT, all three models share the same PCB layout, antennas, and components. The unlicensed band data for the parent model remains representative for the variant model (equipment classes DSS, DTS, NII and DCD) and test reports for the parent model plus test reports with the spot check data for the variant model have been submitted. The power to be listed on the F-731 and FCC grants for these bands are the values detailed in the parent reports as the spot check data shows all values within expected tolerances of the parent model.

Regarding the licensed bands (equipment code PCE), all three models share the same PCB layout and the components except the licensed bands antennas. Therefore, the conducted test data of licensed bands from FCC ID: PY7-83262V and FCC ID: PY7-24116L can be re-used to FCC ID: PY7-34424G, and FCC ID: PY7-34424G report has full radiated test data for the licensed bands.

For SAR, WLAN and Bluetooth SAR data and WPT RF Exposure data are referenced from the parent model FCC ID: PY7-83262V and are leveraged to cover the variant FCC ID: PY7-34424G. SAR The data reuse test plan was approved via manufacturer KDB inquiry. The variant model SAR report has full tested data for the licensed bands.

	Indicates full set of test data. Values in this report to be listed on the grant for these bands.					
	Partial test data used to confirm that the parent model data is representative for the variant model. Data for these bands is for reference only
