MagSafe® Compatible Mode		Specifications	Troubleshooting	FCC Compliance
A RECOVER	Note: iPhone [®] MagSafe [®] users must use a MagSafe [®] compatible phone case. Thick cases will reduce the magnet's ability to hold the iPhone device. If you prefer to use your thick case, you can hold your phone using the "Automated Arm Mode"	The device supports wireless charging up to 15W and is compatible with 10W/ 7.5W/ 5W wireless charging. Wireless Charger Input: DC 5V-2A 9V-2A	Issue Solution Phone won't "stick" in MagSafe® mode A MagSafe® compatible device & MagSafe® compatible phone case must be used. Thick cases will reduce the phone holder's super-strong magnet performance.	FCC WARNING: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
<text></text>	<section-header><section-header><section-header><section-header><section-header><text><section-header><text><section-header><text><text><text><text><text><text></text></text></text></text></text></text></section-header></text></section-header></text></section-header></section-header></section-header></section-header></section-header>	Baseline Power Profile: 15W Max Charging Port: USB-C Standby Power Consumption: <0.5W The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirementsof KDB 447498.	Phone won't wirelessly charge Confirm that your mobile phone supports wireless charging. You can look up your phone's specifications online. Confirm there aren't any items stuck to your phone or case that will block the wireless charge such as pop-holders, finger rings, desk stands or metal plates. Extra-thick cases can reduce or prevent wireless charging.	Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
			Make sure you use the included high-power 12-24V charger that came with your kit. Check the specifications of your wireless phone. Your phone may not support 15W wireless charging. Extra thick cases can reduce or prevent wireless charging.	If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver.
