2.2 Separated installation

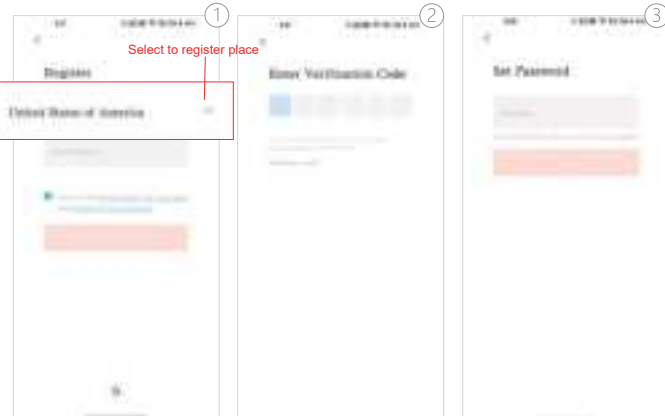

3. APP INSTALLATION

3.1 Search and download "Tuya Smart" in major application markets or scan the QR code below to download the APP.

3.1.1 Once you download the APP to your smart phone, you may enter the first page which you can Login with existing account or register.

(If you are the new user of Smart Life and don't have an account, please choose register first and follow the below screenshots to complete the registration.)

(If you have the existing account, there are two ways to login, one is with SMS verification Code, the other one is with password. In case you forget the password, you may choose login with SMS verification Code or you can choose forgot password to reset it by Entering Verification Code which sent to you mobile via message.)

3.1.2 Once the account has been setup successfully, then you will automatically enter the page of "add device", kindly follow below steps to add the camera.

Step1:

Open TuyaSmart APP, click "+" on the top right corner of the page "HOME", then select "Add Device".
Select camera & Lock
Then select smart camera (Wi-Fi)

Follow the steps in the APP to reset the camera.
Select "QR code for camera" to add your device by QR code.
Check the prompt then click "Next"

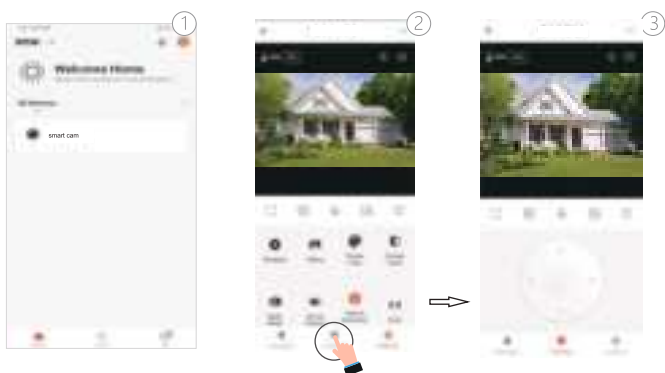

Step2:

Select your "Wi-Fi Network Name" and then Password, and then click OK. The product only supports 2.4GHz WiFi. Scan the QR Code on your phone with camera. Heard a prompt tone, then click "I Heard a Prompt".

Connecting Device, make sure camera device is near the router, added successfully click on Done. You will get into home page.

Step3. If you choose " the other mode " on the top of the right side, you may find QR Code Net-pairing Which you will go back to the "Add device" page and process it again like above procedure. Or you can choose "Smart configuration" and follow the below screenshots and after that you will see the device added successfully.

4. Frequently Asked Questions

(1) Can I share with family and friends?

Yes, you can share your cameras with family and friends who will have access to view the camera and control your bulbs, plugs, and other devices. In the app, click the Family name at the top and click on the "Home Management" button, and you will be able to give or revoke sharing permissions. In order to share, the other user should already have downloaded the app and registered a new account.

(2) What's the Wireless Range?

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.

(3) How many cameras can I control?

Tuya Smart app can control an unlimited amount of devices in an unlimited amount of locations. Your router may have a limit of how many devices can be connected to one router.

(4) My device can't be connected to network with App

- Make sure the device is under the config status (indicator light is flashing quickly).
- Make sure the Wi-Fi is available and the device is not far away from the router.
- Make sure the Wi-Fi password you input is correct.

(5) My device shows offline in my App

- Make sure the device is powered on.
- Make sure the network is stable and the Wi-Fi name and password not modified. If not, add device again. If the network is normal, but it's still offline. Check if there are too many Wi-Fi connections. You can restart your router to check the status of the device.

(6) My phone cannot be added as a device

First, confirm that the device is turned on normally and the Wi-Fi signal is 2.4GHz. If you still cannot connect, please press and hold the reset button at the bottom of the device for 12 seconds. After hearing the voice prompt, wait for 10 seconds and the device will restart. See The device prompt light flashes red and green, just connect to the phone again!

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
