

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device, including the circuit board and battery, placed next to a ruler for scale. The device is shown in two views: one with the battery cover removed and one with the circuit board exposed. The ruler is marked in centimeters and millimeters.
Solder Board-Component View 1	 A close-up photograph of a small electronic component, likely a microcontroller or sensor, soldered onto the circuit board. The component is labeled with "MS-C SW", "2018.10.25", and "CN2". It is positioned next to a ruler for scale.

Solder Board-Component View 2	 A photograph showing a small, rectangular black component with two blue circular solder points. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100 mm.
Solder Board-Component View 3	 A photograph showing a small, rectangular black component with two blue circular solder points. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100 mm.

Solder Board-Component View 4	 A photograph of a small electronic component, likely a connector or interface board, mounted on a blue solder mask. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component has a white label with the date "2020.9.17" and the text "CNI".
Solder Board-Component View 5	 A photograph of a larger electronic component, possibly a microcontroller or processor board, mounted on a blue solder mask. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component has various components, including a large integrated circuit (IC) and several smaller components.

Solder Board-Component View 6	 A photograph of a small electronic circuit board (PCB) with various components, including a microcontroller, memory chips, and connectors. The board is placed on a blue background with a black ruler for scale. The ruler shows dimensions in millimeters (0 to 100 mm) and inches (0 to 4 inches). The board is oriented horizontally, and the ruler is placed vertically to its left.
Solder Board-Component View 7	 A photograph of the same electronic circuit board (PCB) as in View 6, but from a different angle. The board is placed on a blue background with a black ruler for scale. The ruler shows dimensions in millimeters (0 to 100 mm) and inches (0 to 4 inches). The board is oriented horizontally, and the ruler is placed vertically to its left.

Solder Board-Component View 8	 A photograph of a small, rectangular printed circuit board (PCB) assembly. The board is populated with various electronic components, including a central microcontroller, several resistors, capacitors, and a blue push-button. It is placed on a black surface with a white millimeter ruler for scale. The ruler shows dimensions in millimeters, with markings every 10 mm and sub-markings every 1 mm. The board is oriented horizontally, and the ruler is placed vertically to its left.
Solder Board-Component View 9	 A photograph of a small, rectangular printed circuit board (PCB) assembly. The board features a yellow rectangular component, likely a sensor, and a small circular component, possibly an LED. It is placed on a black surface with a white millimeter ruler for scale. The ruler shows dimensions in millimeters, with markings every 10 mm and sub-markings every 1 mm. The board is oriented horizontally, and the ruler is placed vertically to its left.
