

Attestation

There are two different tuned-up powers for PCL=5 in GSM 1900 band as the product BenQ/56W11 is in mass production stage. The power of PCL=5 is 30.1 dBm for GPRS single transmitting mode and the power of PCL=5 is 29.2 dBm for GPRS and W/LAN co-transmitting mode.

These maximum power levels will be implemented in all production models capable of both single and dual transmission modes.
