Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', showing a soldered USB connector. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 40 mm.
Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled '5', showing a series of soldered components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 60 mm.

Solder Board-Component View 6	 A photograph of a small, rectangular, yellowish-green component, likely a solder mask or a small PCB, placed on a blue textured surface. The component has a white logo on the left and text on the right: "UNIUBI-1009-LED REV1.1" and "20190612". A black ruler with white markings is positioned below the component, showing measurements in millimeters (mm).
Solder Board-Component View 7	 A photograph of a small, rectangular, green PCB component, likely a solder mask or a small PCB, placed on a blue textured surface. The component has various electronic components, including a central chip and several smaller components. A black ruler with white markings is positioned below the component, showing measurements in millimeters (mm).

Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, labeled 'DYCS-RS232-VL1', positioned on a black surface with a blue textured background. A white ruler is placed horizontally below the component, showing measurements in millimeters (0 to 50 mm) and centimeters (10 to 90 mm). The component features several surface-mounted components, including a central integrated circuit (IC) and various passive components like resistors and capacitors. The text 'C D C + 3V3' is visible on the board.
Solder Board-Component View 9	 A photograph of a small green printed circuit board (PCB) component, labeled 'DYCS-RS232-VL1', positioned on a black surface with a blue textured background. A white ruler is placed horizontally below the component, showing measurements in millimeters (0 to 50 mm) and centimeters (10 to 90 mm). The component features a large, circular, metallic component, likely a connector or a lens, and several surface-mounted components like resistors and capacitors.

Solder Board-Component View 10	 A photograph showing a small green printed circuit board (PCB) component with a white connector, resting on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 50.
Antenna View	 A photograph showing the internal components of a device, including a green PCB, a battery, and a black rectangular antenna. A red box highlights the antenna, and a red line points from a label "WIFI Antenna" to it. The label "YJSC-WIFI-V01" is visible on the antenna.
