Dear Sir/Madam:

The following information describes the changes made to the Cobham Wireless idRU model number RRU0019 FCC ID: NEO43ID7D8C17C19A to allow the use of an alternative manufacturers amplifiers.

The parts changed from the original submission were limited to the following parts,

700MHz MCPA original Part number 1510993146 replaced with 1510993256
800MHz MCPA original Part number 1510993145 replaced with 1510993226
1900MHz MCPA original Part number 1510993143 replaced with 1510993225

With respect to FCC KDB178919 D01 clause III.D

1. With respect to the connections to all three amplifiers, the new alternative devices use all the existing connections currently used in the booster.
2. The functionality of the alternative amplifiers is the same as the existing.
3. The radio parameters for the alternative amplifier are in accordance with those of the present devices.
4. The alternative amplifiers are located in the same areas and therefore the same conditions apply.

If you require any further information on the above, please let me know.

Yours sincerely

Brian Barton
