Re: Application for TCB Grant of Certification for FCC ID: LF52696

Gentlemen:

Transmitted herewith is an application for certification of a device for patient assistance. The patient assistant is a medical device that incorporates a low frequency telemetry link for the purpose of commanding and querying of an implanted device. Once the requested function is completed, capability for further assisting the patient with a graphical presentation is possible. Since the device is used for medical diagnostic test purposes, emissions from the digital electronics associated with it are exempt under the provisions of Section 15.103(c).

The FCC compliance statement has been added to the manual do to the small unit size.

Sincerely,

Phillip Inglis  
Consultant to Medtronic
