**Overview**

This application is for a class II permissive change to allow co-location with an RFID radio, which is internal to a pistol grip (Intermec Model IP3). The IP3 is an optional accessory that attaches externally to the bottom of the 700C. In this configuration, the 700C cannot be used in any body-worn configurations (holsters, belt clips, lanyards, etc). Also, it cannot be used as a cell phone near the head. In this configuration the CDMA radio is for wide area network (WAN) data transmission only.

**Recommendation**

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
