Address	510 Shenandoah Drive
City, State, Zip	Shakopee, MN 55379
Job Number	TECO0016
Model	FWP-44T000MOD
FCC ID	F8I-PSM800M
Agent	N/A
Approval Type	Original
Equipment Class	B2I Industrial Booster
Rule Part	90

Overview

The FlexWave PRISM, in its most basic configuration, serves as a transport between a FCC approved base station and a remote antenna. The system consists of two units; a "host", that is co-located with the base station, and a "remote", that resides at the location of the antenna. Both units perform wide band digitization, fiber optic transport, and reconstruction of the RF signal. In addition to RF transport, Flexwave PRISM also provides 10/100bT Ethernet connectivity between the host and all connected remotes. The entire system is monitored and controlled via an onboard web server that is accessible with a standard web browser.
