

FCC WARNING:

This device complies with Part 15 of the FCC Rule. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

1. Caution statement:

Modifications not approved by the party responsible for compliance could void user's authority to operate the equipment.

2. Instruction statement:

This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- *Reorient or relocate the receiving antenna.

- *Increase the separation between the equipment and the receiver

- *Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- *Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

LED Desk Light User Manual

The product is a LED desk light with Qi wireless charging function. This wireless charging function only supports devices with wireless charging capability. If the device does not have wireless charging capability, you may need to purchase a compatible wireless receiver. The wireless charging module can transmit 5W of charging power for a low-power wireless charging receiving device.

The "Qi" symbol is a trademark of the wireless power consortium.

Operating frequency: 110.5-205kHz

Charger output power: 5W

Output voltage: 5V

Intelligent detection: output rated current- 1A

The device features exclusive multi-functional intelligent protection technology provides over-current protection, over-temperature protection and short-circuit protection.

The over-temperature protection: over-temperature(chip internal resistance) protection value: 60°C.

The over-current protection: over-current protection value- 1.2A

The short-circuit protection: if the metal materials on the base, the red indicator light will be flashed.

The indicator light instructions:

1. The red and green lights flash twice at the same time when connect the power.
2. Lights up in red to indicate charging status.
3. When the green light is on, it means the device is fully charged.
4. When the red light flashes, it means that it cannot be charged, please check whether there is interference from metal substances.

IMPORTANT SAFETY INSTRUCTIONS

-TOPREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT.
