3. RC Viewer Manual

Open the internet browser then download the manual on the following link in <https://www.momentomax.com/resources>

RC Viewer is a web browser application that allows you to view and control your RC car from anywhere. It is a free application that can be downloaded from the [Momentomax website](https://www.momentomax.com/resources). The application is designed to be used on a computer, tablet, or smartphone. It provides a user-friendly interface for controlling your RC car, including a virtual joystick and a variety of settings. The application also allows you to view live video from your RC car's camera. To use the application, you need to have a compatible RC car and a stable internet connection. The application is available in both English and Spanish.
