RE: FCC ID: CWTWBU624\_ATCB004197  
Attention: Yoshiko Mizuta

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that part 15 devices tested in accordance with ANSI C63.4 are to be tested in worse case configuration. Other than stating the device was tested in all three orthogonal planes, the test report does not state what measures were taken to ensure that the device was transmitting with a maximum data rate (i.e. if the data transmission coding is factory set, how is it determined that the factory has set the device to maximize emissions? If the device can be set at the lab, what efforts were taken to establish a maximized data rate and data scheme?). Please explain what efforts were taken to make sure that the data rate used was worse case.
