3. Differences

Different models are derived for marketing purposes. The difference between AutoSet, CPAP and Elite models are the therapy modes they support, whereas different variants of AutoSets, CPAPs and Elites are based on the customer centric features supported by the device. These settings are configured at manufacturing via a configuration file and is independent of the cellular, Bluetooth and FG software.

In summary, the differences between the device models mentioned in [Section 1](#) are:

- Therapy modes
- Data settings
- UI language
- Name plaque
